

# Echo360 Building Block

## Definition

---

Echo360 provides an easy way to capture teaching materials featuring audio, video and presentation visuals. Through a partnership between Blackboard and Echo360, you can now create rich media materials and publish that customized content right to your Blackboard® course. As a Blackboard Learn™ customer, your institution can quickly access this free solution, conveniently available as a Blackboard Building Block™.

## Stakeholders

**BO:**

**PO:**

**TO:** Tim Lambert

**SM:** Stefanie Henderson

**Others:**

## Campus Utilization

Utilizing the Basic LTI Building Block is possible to configure multiple institutions with a LTI "Tool" in Bb Learn. To configure this UMOL will need the following from your campus Echo 360 Server:

- Launch URL
- Consumer Key
- Shared Secret

This information can be found from the Configuration tab, LTI sub-tab where you should see a Blackboard LTI link. If you do not see the Blackboard LTI link you will need to seek support from Echo 360 for configuration.

## Licensing and Contracting

UMassOnline does not hold a specific license with Echo 360 as each campus will have their own licence.

## Associated Systems

- [Blackboard Learn](#)
- [Echo360](#)

## Interested Campus Utilization

---

- UMass Amherst
- UMass Dartmouth
- UMass Worcester

## Integration

---

- *Integration is done via the OSELOT Basic LTI Building Block which uses more of the LTI features available than the version of LTI that Bb Learn ships with.*
