

iClicker Building Block

Definition

The iClicker Learn Building Block will allow you to integrate the iClicker student response system directly into the [Blackboard Learn](#) course content areas.

Stakeholders

BO:

PO: Dale Starr (UMA)

TO: Tim Lambert

SM: Stefanie Henderson

Others: Theresa Nelson-Miller (UMB), Tracey Russo (UMD), Ryan Scott (UMA)

Community

The following campuses are interested in using the iClicker Building Block:

- UMass Amherst
- UMass Boston
- UMass Dartmouth

Integration

Integration into Bb Learn Production is now complete. Instructors will need to install either the Mac or Windows version of the attached zip files. A "shared secret" is also required which can be requested from UMOL staff.

[iClickerLMSfiles_Windows.zip](#)

[iClickerLMSfiles_MAC.zip](#)

i>clicker integrate is a course management wizard (Building Block) that allows for one-click integration of i>clicker polling data with your campus LMS. i>clicker integrate is a course management wizard and CMS plug-in that allows for seamless integration of i>clicker polling data with your campus LMS.

- Enables students to register their i>clicker remotes directly within the campus LMS
- Allows faculty to seamlessly sync class rosters and student polling results with their campus LMS
